

A SISCAPA-MRM training / QC kit is in beta testing.

Each kit contains:

- monoclonal antibody (mouse OPN)
- magnetic beads
- calibrators
- heavy and light peptide standards
- standard operating procedure for generating a calibration curve and comparing results to historical data

200 FREE SISCAPA-MRM training / QC kits will be available soon.

Interested parties can contact Tom Slyker (Tom_Slyker@bio-rad.com) at Bio-Rad Laboratories to request one.
