

Have a question regarding mass spec tools for the clinical or clinical research laboratory? Take advantage of the expertise offered by the exhibitors and corporate supporters of this conference.

Agilent Technologies

Agilent is a leader in life sciences, diagnostics and applied chemical markets. The company provides laboratories worldwide with instruments, services, consumables, applications and expertise, enabling customers to gain the insights they seek. Agilent's expertise and trusted collaboration give them the highest confidence in our solutions. Please visit <http://www.agilent.com/home> .

Cerilliant a MilliporeSigma Corporation

Certified Reference Materials & Certified Spiking Solutions®-MilliporeSigma's Cerilliant portfolio contains both stable labeled & unlabeled reference materials including Drugs (pharmaceutical, OTC, & TDM), Hormones & Biomarkers, including Bile acids, Fatty acids, Vitamins, Alcohol & Tobacco Biomarkers. Custom services include synthesis, analytical certification, packaging & custom solution standards. ISO Guide 34, ISO/IEC17025, ISO 13485 & ISO 9001; also compliant to ISO 15194. Quality system incorporates cGMP and GLP. Please visit www.sigmaaldrich.com/cerilliant .

Chromsystems

Chromsystems is a leading global company providing ready-to-use reagent kits and supplies for routine clinical diagnostics by high performance liquid chromatography and tandem mass spectrometry, the latter representing the gold standard for a number of parameters. Our portfolio includes complete kits as well as controls and calibrators for a highly accurate and cost-effective analysis. Products are comprehensively validated, CE-IVD compliant and enable any laboratory to introduce HPLC and LC-MS/MS methods into their diagnostic routine. We combine these high quality products with an excellent support programme and service for our customers. For more information please visit www.chromsystems.com.

Hamilton Company

Hamilton Company is a global enterprise with headquarters in Reno, Nevada; Franklin, Massachusetts; and Bonaduz, Switzerland and subsidiary offices throughout the world.

We are an industry leader in the design and manufacture of liquid handling, process analytics, robotics and automated storage solutions. For more than 60 years, Hamilton has been meeting customer needs with a combination of quality materials and skilled workmanship that ensures the highest level of performance. Hamilton's continued commitment to precision and quality has earned the company global ISO 9001 Certification.

Hamilton Company is focused on combining innovation and accuracy to deliver unparalleled products to our customers. For more information, please visit www.hamiltoncompany.com/.

Indigo BioAutomation

Indigo BioAutomation is an Indianapolis, IN, based company that provides automated analytics for clinical research. Since 2008, Indigo has been leading the charge in clinical research automation. Leading clinical, reference and toxicology laboratories have benefited from Indigo's innovative and transformative automation system, ASCENT™.

At Indigo, we are creating revolutionary software that will help save lives. Our employees are thought leaders and visionaries. We are a community of passionate and skilled individuals working together to change an industry. Given that ambition, we rely on our teams every day to make their number one priority delivering cutting-edge products to our clients. And we've created an environment which provides an unparalleled level of support. For more information, please visit indigobio.com/.

SCIEX

SCIEX helps to improve the world by enabling scientists and laboratory analysts to find answers to the complex analytical challenges they face in basic research, drug discovery and development, in addition to food and environmental testing, forensics and clinical research and diagnostics. As part of SCIEX, SCIEX Diagnostics brings the power, flexibility, reliability and accuracy of mass spectrometry technology to clinical testing laboratories. SCIEX Diagnostics offers an expanding portfolio of mass spectrometry based solutions and assays for in vitro diagnostic use, enabling customers to deliver high-quality results to clinicians who make decisions affecting patient care. For more information, please visit www.sciexdiagnostics.com.

Thermo Fisher Scientific

Achieve greater productivity and confidence when providing laboratory-developed test results to the healthcare professionals you serve. Introducing Thermo Scientific™ high-performance medical devices for in vitro diagnostic use — Thermo Scientific™ Prelude MD™ HPLC, Thermo Scientific™ Endura MD™ mass spectrometer, and Thermo Scientific™ ClinQuan MD™ software. — help you deliver LC-MS results easily, quickly and with more confidence.

Visit us in our booth to see our 3 new medical devices our customers will use to give physicians more accurate, confident results and help them to make diagnostic decisions for the patients under their care. For more information, please visit www.thermoscientific.com.

UTAK Laboratories

Founded in 1973, UTAK Laboratories, Inc. is a recognized market leader of handcrafted quality control products used for analytical measurement in forensic and clinical laboratories. UTAK offers hundreds of stock and custom serum, whole blood, urine and oral fluids controls for use with any methodology, on any testing platform. Headquartered in Valencia, CA, UTAK serves clients globally, including many top university hospitals, government facilities, forensic and research laboratories. ISO-certified, UTAK is family-owned and renowned for its quality products and personalized customer service.

The UTAK mission is to provide accuracy, support, and knowledge resources to the discipline of analytical measurement for laboratory medicine. For more information, please visit www.UTAK.com.

Waters Corporation

Waters Corporation creates business advantages for laboratory dependent organizations by delivering scientific innovation to enable customers to make significant advancements. Waters helps clinical customers perform routine, high capacity testing, optimize laboratory operations and ensure regulatory compliance with a connected portfolio of separations and analytical science, laboratory informatics and mass spectrometry. For more information, please visit www.waters.com.
