**NJAACC with support from Abbott Diagnostics presents:**

Sten Westgard, MS: Director Client Services, Westgard QC, INC.

**The Six Sigma Spectrum: benchmarking performance in chemistry, hematology, immunoassay, serology, and more....**

- Getting the Right Results, First Time, Every Time
- See how you can bring Six Sigma concepts to life in your lab to increase efficiency, reduce costs and maintain patient safety.

Sharon Cox, MT(ASCP) SC: Core Laboratory Supervisor, St. Francis Hospital, Tulsa OK.

**Building Quality, Sigma-Driven Lab and Optimizing Efficiency Using Automation and Informatics**

How to develop a system in your laboratory to visualize complex data to improve efficiency and quality of results using the following systems:

- Moving Averages
- Remote instrument performance monitoring
- Real time QC Monitoring
- Monitoring of Analyzer and Assay Performance using Sigma Metrics
- Inventory Management

With support from Abbott, both Sten and Sharon presented this industry workshop at the 2014 AACC National Meeting in Chicago. It was so well-received that NJAACC invited them to bring their show on the road and share this exciting approach to consolidation, quality control and information management with our members here in the East. Please encourage colleagues to attend, especially those in hospital labs. Bring your Hematology friends as well! You will not be disappointed!
