Analysis of Lysosomal Enzymes in Dried Blood Spots**Thursday, September 17, 2015**

Olaf A. Bodamer, M.D., Ph.D. FAAP, FACMG is the current Park Gerald Chair in Genetics and Genomics, Harvard Medical School and the Associate Chief, Division of Genetics and Genomics at Boston Children's Hospital. Dr. Bodamer obtained his M.D. degree from the University of Heidelberg, Germany and his Ph.D. degree from the University of Saarland, Germany. Following Pediatric residencies in Germany and at Great Ormond Street Hospital in London, he moved to the United States for a fellowship in Clinical and Biochemical Genetics at Baylor College of Medicine, Houston, Texas.

Following a period as director of the Austrian Newborn Screening Program, he returned to the United States in 2010 to join the University of Miami as the founding Chief of the Division of Clinical and Translational Genetics and Director of the Medical Genetics Laboratories. Dr. Bodamer was recruited to Boston Children's Hospital in 2015 as Associate Chief for Genetics and Genomics, where he also has an established research laboratory with a focus on lysosomal storage disorders, genetics of premature birth and Rasopathies. He is a member of several Editorial and Scientific Advisory Boards, including Molecular Genetics and Metabolism, Journal of Inherited Diseases and Translational Medicine and of Patient Organizations (NPKUA and OAA) respectively. Dr. Bodamer has a busy clinical practice at Boston Children's Hospital where he sees individuals with complex genetic disorders including inborn errors of metabolism. In addition, he has been active in several areas of translational genetics and genomics research and involved in educational and teaching activities within Harvard Medical School.
