

**Pacific NW Section of AACC would like to invite you to the following dinner and presentation on December 5, 2013.**

**Continuing education credit is available!**

**Title:** *Analytical, Legal, and Therapeutic Implications of Neonate Drug Testing.*

**Speaker:** **Steve Cotten, PhD**

Associate Director, Chemistry and Toxicology  
 Assistant Professor, Pathology  
 Ohio State University, Wexner Medical Center  
 4164 Graves Hall  
 333 West 10<sup>th</sup> Avenue  
 Columbus, OH 43210

**Program**

**Description:** Toxicology testing in newborns is an overlooked area of drug screening. This population has specific challenges related to sample type, detected analytes and medico-legal implications of the results provided by laboratories. After attending this activity attendees will be able to:

- Recognize limitations of specific neonate specimens for drug testing and common pitfalls related to specimen quality.
- Taylor toxicology testing menus for neonate specific metabolites.
- Apply the results of neonate drug testing to concepts related to Neonate Abstinence Syndrome.
- Balance institution specific resources to address medico-legal implications of toxicology results.

**Location:** **Doubletree by Hilton**

100 N.E. Multnomah  
 Portland, OR 98232  
 (503) 281-6111

**When:** **December 5, 2013**

6:00 PM Social Hour  
 7:00 PM Dinner  
 8:00 PM Scientific Program by Dr. Cotten
