Approved for 1 ACCENT Continuing Education Credit

Program Information

Optimizing LC-MS/MS for TDM of Immunosuppressants is the fifth of 12 programs in AACC's "Cutting-Edge Technologies, Common Sense Solutions" webinar series. Attend this webinar and learn the advantages and disadvantages of using mass spec versus immunoassay for monitoring the use and effectiveness of immunosuppressant drug. Standardization efforts, current thinking on how to best monitor everolimus, and other hot topics in measuring and monitoring immunosuppressant drugs will be addressed.
