

Sponsored Webinar San Diego Section, AACC

FREE to members and their guests

Tuesday, July 9, 2013

11:00am PT - 12:00pm PT

**Beyond "Good" and "Bad" Cholesterol:
Is it Time to Consider a Particle Alternative?**

James Otvos, PhD

Founder, Executive Vice President and Chief Scientific Officer,
LipoScience, Inc., Raleigh, NC

**Location: USCD Center for Advanced Laboratory Medicine
UC San Diego, 10300 Campus Point Drive, San Diego, CA 92121
Conference Room C, on the NE side of the building;
First parking lot on the right as you enter the complex**

Approved for 1 ACCENT Continuing Education Credit

Program Information

LDL cholesterol (LDL-C) remains the primary focus for cardiovascular risk assessment in many physicians' offices throughout the U.S., but many patients who meet their target "LDL-C goal" still develop complications from atherosclerotic vascular disease and suffer from cardiovascular events. These patients bear the burden of having residual risk not identified using traditional metabolic and cardiovascular markers and could benefit from testing for atherogenic particle concentrations beyond LDL-C -- including non-HDL-C, LDL particle number, apolipoprotein A and apolipoprotein B.
