First parking lot on the right as you enter the complex**

Approved for 1 ACCENT Continuing Education Credit

**Program Information**

*Creating, Communicating and Maintaining Effective Laboratory SOPs* is the fifth of eight programs in the AACC/Seattle Children's Hospital Lab Management Series of webinars. Is there confusion in your lab about what's "acceptable" in terms of sample integrity? Are there inconsistencies in how lab staff performs some of the procedures in your lab? The implementation of well-written standard operating procedures (SOPs) could clear up inconsistencies and confusion, while empowering lab staff to reject requests that could put your lab or patients at risk. Register today and learn how to write and maintain excellent laboratory SOPs.
