Novel Biomarkers for Diagnosing and Managing Heart Failure

Christopher deFilippi, MD

Associate Professor of Medicine, Division of Cardiology,
University of Maryland, Baltimore, MD

**Location: USCD Center for Advanced Laboratory Medicine
UC San Diego, 10300 Campus Point Drive, San Diego, CA 92121
Conference Room C, on the NE side of the building;
First parking lot on the right as you enter the complex**

Approved for 1 ACCENT Continuing Education Credit

Program Information

Novel Biomarkers for Diagnosing and Managing Heart Failure Patients is the eighth of 12 programs in AACC's "Cutting Edge Technologies, Common Sense Solutions" webinar series. Researchers continue to find new ways to use established biomarkers, such as BNP and NT-proBNP, to diagnose, manage and assess risk in heart failure patients, but are also validating a number of emerging assays for heart failure syndromes. Attend this webinar and learn about the latest developments in using biomarkers to diagnose and care for patients with this highly prevalent cardiac condition.
