Program Information

This webinar, which features Brad S. Karon, MD, PhD, of the Mayo Clinic, is the last of eight programs in the AACC/Seattle Children's Hospital Lab Management Series of webinars. Register and hear Dr. Karon discuss why and in what instances it is important to achieve concordance between POC test results and central laboratory test results, methods lab can use to meet the challenges involved in achieving concordance, and how to identify common sources of error affecting POC test results that could contribute to discordance between central laboratory and POC methods.
