

MOLECULAR PATHOLOGY DIVISION NEWSLETTER

Dear colleagues,

It is time, once again, to take a step away from our local practices and convene as a group, to share our experiences, our stories, and our thoughts, at the Annual Meeting of the AACC, starting July 26, 2015 in Atlanta, GA. I am very much looking forward to the meeting and the opportunity to talk with you. If you have never been to the meeting, I urge you to attend; this is the world's largest event for laboratory medicine, attended by leading experts in clinical chemistry, molecular diagnostics, mass spectrometry, translational medicine, laboratory management, and other hot areas in laboratory medicine. If you are still undecided, check out the conference program at <https://www.aacc.org/meetings-and-events/annual-meeting>

While you're at the conference, please take note of the two main events that the Molecular Diagnostics Division has scheduled:

- **Molecular Pathology Division Poster Award Session**- come see the research posters whose abstracts were selected by the Science and Education Committee to compete for awards, and hear the authors, many of whom may be future leaders of the Molecular Pathology Division, present their work alongside their posters. *Monday, 7/27/2015, 12:00-2:00 PM, at Hyatt Regency Atlanta, Vinnings*

- **Molecular Pathology & Proteomics Divisions Combined Luncheon**-come mingle with members of two AACC divisions devoted to advanced technologies, and share your ideas and suggestions for activities for our divisions for the coming year. Seating is limited for the combined luncheon on Tuesday and will be available on a first come- first served basis. *Tuesday, 7/28/2015, 12:00-2:00 PM, at Hyatt Regency Atlanta, Kennesaw*

Transforming Patient Care with Molecular Testing: Current and Future Impacts - a special evening event organized by AACC with particular emphasis on molecular diagnostics. Registration is free *Tuesday, July 28, 5:30 – 7:30 pm Hyatt Regency Atlanta, International Ballroom North*

<https://www.aacc.org/store/conferences/10100/transforming-patient-care-with-molecular-testing-current-and-future-impacts>

In addition, many of the courses, symposia, and plenary sessions at this year's meeting have a Molecular Pathology focus. I urge you to review the program at the AACC website, and take advantage of these educational opportunities!

See you in Atlanta,

Neal
